The SP Controls SmartPanel controls the video projector’s functions.

Pressing a button on the SmartPanel sends a command to the video projector. Each command takes a few seconds to execute; after pressing any button on the SmartPanel, wait at least 5 seconds before pressing another button.

The SmartPanel has an auto-shutoff timer. When the PROJECTOR ON button is pressed, the panel sets a 3 hour timer. The video projector power automatically switches OFF after 3 hours unless the timer is reset. The timer may be reset any time the video projector power is ON. To reset the timer, press any button on the SmartPanel EXCEPT the PROJECTOR OFF button.

The Panasonic PT-FTW100NTU projector can display images from a computer and the document camera * at the same time **.

TO DISPLAY TWO IMAGES SIDE-BY-SIDE, PERFORM THE OPERATIONS IN THIS ORDER:
1. Locate the SmartPanel’s PROJECTOR ON button and press it to switch the video projector ON. Wait 15 seconds to verify that the projector is ON. A red Warm-up LED on the SmartPanel will illuminate while the projector warms up; a green Ready LED will be steadily illuminated when the projector is ready to use.
2. Use the SmartPanel to select the input you wish to display on the right side of the side-by-side display.
3. Use the SmartPanel to select the input you wish to display on the left side of the side-by-side display.
4. Press and hold the PROJECTOR ON button, press the COMPUTER button, and release both buttons to enable side-by-side mode.

To exit side-by-side mode, press the button corresponding to the item you wish to display in full-screen mode.

* Other combinations are possible. Please call for more information.
** In side-by-side mode, images are considerably smaller than in full-screen mode.
TO OPERATE THE MEDIA EQUIPMENT FOR COMPUTER DISPLAY

PERFORM THE OPERATIONS IN THIS ORDER:

1. Locate the SmartPanel’s PROJECTOR ON button and press it to switch the video projector ON. Wait 15 seconds to verify that the projector is ON. A red Warm-up LED on the SmartPanel will illuminate while the projector warms up; a green Ready LED will be steadily illuminated when the projector is ready to use.
2. Select the COMPUTER input on the SmartPanel.
3. Locate the VGA cable and connect it to your computer. Verify that the other end of the cable is connected to the LAPTOP jack on the connection plate on the teaching station.
4. Switch the computer power ON. Note: the video projector power must be on and the computer must be connected before the computer is switched on.
5. Enable the external video display on your computer. Consult your computer documentation for instructions.
6. Locate the SmartPanel’s PROJECTOR OFF button and press it to switch the video projector OFF when you are finished.

NO IMAGE?

1. Verify that the video projector power is on and verify that the COMPUTER input is selected on the SmartPanel.
2. Restart the computer.

TO OPERATE THE MEDIA EQUIPMENT FOR DVD OR VIDEO TAPE DISPLAY

PERFORM THE OPERATIONS IN THIS ORDER:

1. Locate the SmartPanel’s PROJECTOR ON button and press it to switch the video projector ON. Wait 15 seconds to verify that the projector is ON. A red Warm-up LED on the SmartPanel will illuminate while the projector warms up; a green Ready LED will be steadily illuminated when the projector is ready to use.
2. Select the DVD/VCR input on the SmartPanel.
3. Locate the DVD/VCR, switch its power ON, and load the video tape, DVD, or other desired media. Select play using the control buttons on the front of the DVD/VCR.
4. Verify that the amplifier power is ON and adjust the general audio volume. See below for audio instructions.
5. Locate the SmartPanel’s PROJECTOR OFF button and press it to switch the video projector OFF when you are finished.

TO OPERATE THE AUDIO AMPLIFIER

Locate the amplifier’s power switch and verify that the amplifier power is ON. The individual input levels have been preset for optimum operation and cannot be adjusted by users. To increase or decrease the general audio volume, use the volume control buttons on the SmartPanel. To increase the volume, press the VOLUME UP button. To decrease the volume, press the VOLUME DOWN button.
