TO OPERATE THE MEDIA CONTROL SYSTEM (SMARTPANEL) FOR COMPUTER DISPLAY

PERFORM THE OPERATIONS IN THIS ORDER:
1. Locate the SmartPanel's PROJECTOR ON button and press it to switch the video projector ON. Wait 15 seconds to verify that the projector is ON. A red Warm-up LED on the SmartPanel will flash while the projector warms up; a green Ready LED will be steadily illuminated when the projector is ready to use.
2. Select the LAPTOP input on the SmartPanel.
3. Locate the VGA cable and connect it to your computer.
4. Switch the computer power ON. Note: the video projector power must be on and the computer must be connected before the computer power is switched on.
5. Enable the external video display on your computer. Consult your computer documentation for instructions.
6. Locate the SmartPanel's PROJECTOR OFF button and press it to switch the video projector OFF when you are finished.

NO IMAGE?
1. Verify that the video projector power is on.
2. Verify that the LAPTOP input is selected on the SmartPanel.
3. Restart the computer.

TO OPERATE THE MEDIA CONTROL SYSTEM (SMARTPANEL) FOR VIDEO DISPLAY

PERFORM THE OPERATIONS IN THIS ORDER:
1. Locate the SmartPanel's PROJECTOR ON button and press it to switch the video projector ON. Wait 15 seconds to verify that the projector is ON. A red Warm-up LED on the SmartPanel will flash while the projector warms up; a green Ready LED will be steadily illuminated when the projector is ready to use.
2. Select the desired input on the SmartPanel.
3. Locate the desired video source and switch its power ON.
4. Load the video tape, DVD, or other desired media.
5. Adjust the general audio volume. See below for audio instructions.
6. Locate the SmartPanel's PROJECTOR OFF button and press it to switch the video projector OFF when you are finished.

TO OPERATE THE AUDIO AMPLIFIER

1. Locate the amplifier's power button and switch the amplifier power ON. Wait 15 seconds for amplifier warm-up.

   The individual input levels have been preset for optimum operation and cannot be adjusted by users. To increase or decrease the general audio volume, use the volume control buttons on the SmartPanel. To increase the volume, press the VOLUME UP button. To decrease the volume, press the VOLUME DOWN button.

TO USE THE WIRELESS MICROPHONE (if installed):

1. Locate the wireless microphone transmitter and switch the power ON.

NO AUDIO FROM THE WIRELESS MIC?

1. Verify that the wireless microphone receiver’s power switch is ON.
2. Replace the wireless microphone transmitter’s battery.
